

What is the problem?

The Page Avenue (Route D) bridge over the River Des Peres was originally constructed in 1932 and was significantly renovated in 1985. It has reached the point where another renovation for the bridge is needed to ensure it continues to remain safe for the traveling public.

What is the solution?

MoDOT and its Safe and Sound Bridge contractor, KTU, have planned to start extensive renovation work on the bridge in April 2012. The bridge will not close during the renovation work, but traffic will be shifted around the construction, and lanes and turn lanes may be closed or restricted. Construction is projected to be complete by late summer 2012.

How will traffic be impacted?

Currently, there are two lanes of traffic in each direction and a left turn lane. During construction, only one eastbound and one westbound lane of traffic will be able to travel through the construction zone. Crews will start on the north side of the bridge and shift one eastbound and one westbound lane of traffic into the existing eastbound lanes. That portion of the project should take about six weeks, then crews will shift one eastbound and one westbound lane of traffic onto the new westbound lanes to work on the south side of the bridge. During the entire construction process, left turns from side streets and businesses onto Page around the intersection of Page Avenue and Pennsylvania will be restricted, or prohibited, for safety.

How long will this project take?

This project will start in early April and should be completed by late summer 2012.

We Want Your Comments

On traffic flow for the Page Avenue bridge project

Please provide us with your written suggestions or comments by turning them in today or by mailing to:
